Subject: Thanks!

Dear Louis,

Just a quick two big "thank you's".

First, for leading the NWS with uncompromising integrity. re: your defense of the Birmingham office.

Second for your support of our wind and temperature technology and research at GATS. Thanks, in no small part, to your endorsement, Dave Fritts and I now have our Doppler Wind and Temperature Sensor (DWTS) demonstration funded by NASA and the extension to gravity wave detection using the same technology funded by the Air Force. (BTW NASA Ames is now promoting the technology for measuring winds at Mars).

All the very best,

Larry
